ZERA Service⁺ for ITTS – Precision all along the line

Precision is key. Besides long-term stability and absolute precision of ZERA measuring systems, a comprehensive and smooth service is the deciding factor of quality. ZERA, producer of highly accurate test systems has extended the service it offers for stationary **I**nstrument **T**ransformer **T**est **S**ystems and firmly guarantees its customers even higher standards for ensuring a precise test procedure all along the line.

Precision becomes even more binding.

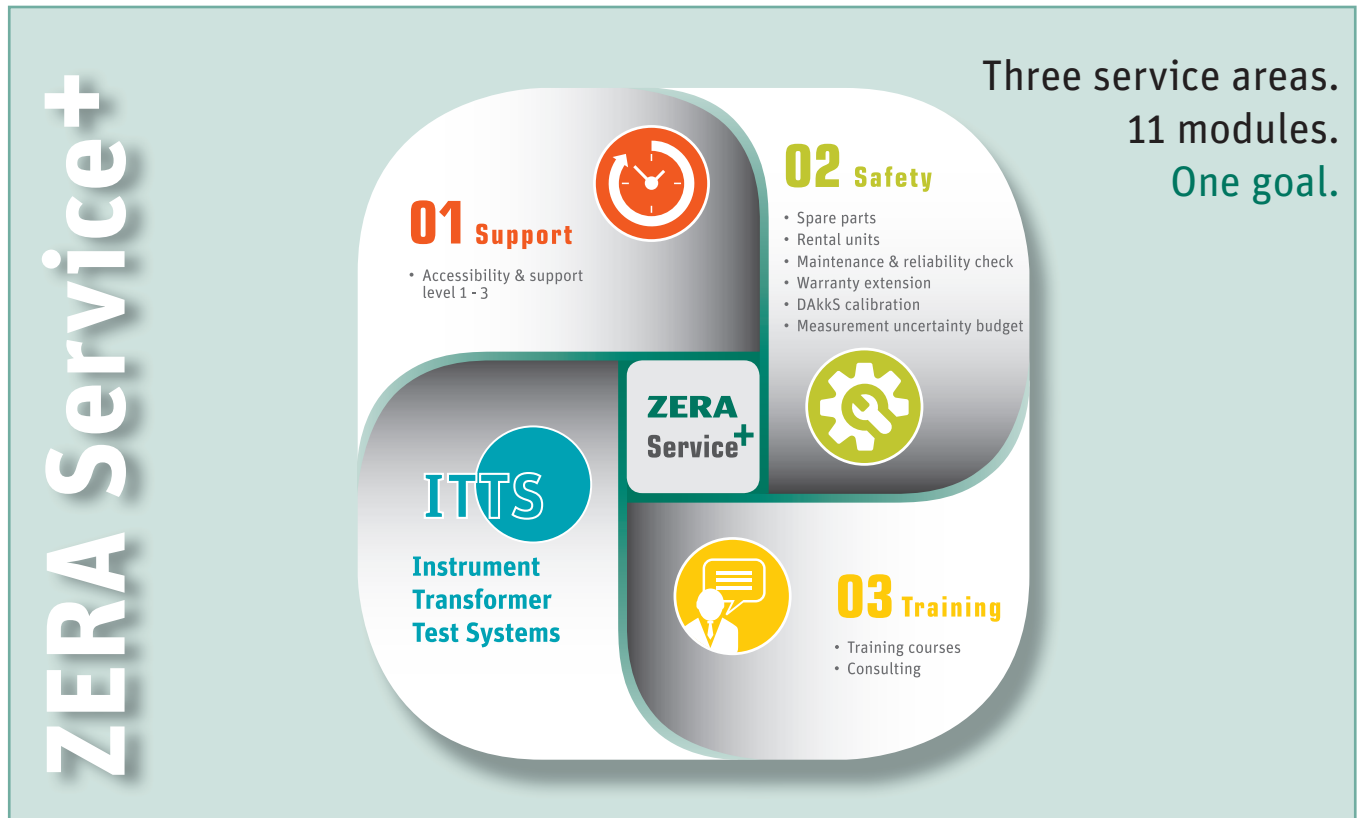

The ZERA Service⁺ for stationary Instrument Transformer Test Systems can be divided into three service areas:

- Support
- Safety
- Training

These three areas contains a total of 11 modules, which you can individually combine to your specific needs. All services are contractually guaranteed. ZERA makes the binding commitment towards lasting service performance and standards.

Service becomes more individual.

As individual as the demands on the test systems are, equally tailor-made is the package of services to be performed. Customers individually receive the service that they need for their measuring tasks. The individual modules are compiled for the customer together with ZERA sales engineers or local representatives and contractually recorded. An all-round, worry-free package that gives the customer the security of being able to work with ZERA testing technology dependably and smoothly for a long time.

Support. Accessible in all instances.
